

The drawing shows a bridge with a central pier and two abutments. The bridge deck is shown with a cross-hatched pattern. Red dashed lines and squares highlight specific structural features, possibly indicating areas of reinforcement or construction details. The bridge is situated over a body of water, with a curved embankment on the right side.

This architectural drawing shows a building complex. At the top is a large square structure with a red dashed border and a blue dashed inner square. Below this is a long, narrow horizontal extension with a purple hatched pattern. To the left of this extension is a curved path or road. Several small square structures with dot patterns are scattered around the main building. The drawing uses various line styles (solid, dashed, dotted) and colors (red, blue, purple, yellow) to distinguish different parts of the plan.

A technical line drawing showing a crane lifting a bridge girder. The crane is positioned on the right, with its boom extending upwards and to the left. Two cables are attached to the end of the boom, supporting a bridge girder. The girder is being lowered into a rectangular frame structure. Arrows indicate the movement of the girder and the crane's boom.
